

Homework #5 – Microsoft Access Assignment

- Create a table in MS Access based on your 10 favorite movies. Include the following fields: Movie Title, Actor, Director, Year Released, Genre (Comedy, Drama, Action, etc.) and Length (in minutes).
- Develop a form in which one would enter additional records. Include a title and make it look appealing. *I will be adding a record to your database to test the functionality of your form.*
- Write the following queries:
 - One that filters database on movies older than 1998
 - One that filters database on comedies with length less than 100 minutes
 - One that filters database on one actor
- Write a report with the following fields included: Movie Title, Actor, Director and Year Released. ***This report should be organized in ascending order of the field “Year Released”.***
