Uppercase: WORKING IN JAVASCRIPT IS FUN
Subscript: JavaScripting can be fun
Superscript: JavaScripting can be fun
Link: All Computing can be fun

- **Style strings**

Create the code that will show the following string styles, make sure it involves JavaScript objects.

Hello World! or should I say Hello World!

I Love Computers could be written as *I Love Computers*

Blinking
Computing can be fun or not so fun: `Computing can be fun`

~~Don't make this mistake~~ or Don't make this mistake

Shout it out to the world!

go cards go! or GO CARDS GO! Which to you prefer?

x5 means one thing and x^5 means another thing. Do you know the difference?

Link: Hello World!   Link to google.

- **Word replacement**

Create the code that will do the following

Have the program prompt the user for a sentence.
Have the program prompt a word that the user will want to replace from the sentence.
Have the program prompt a word that the user will want to use as the replacement word.
Have the program print out the original sentence and then the new sentence with the replacement word.
